

New Dot Shot® Pro Replaces All Adhesive Products

Glue Dots International introduces the new **Dot Shot® Pro**, an innovative adhesive applicator that provides a safe, smart alternative to tape guns, hot glue guns, or liquid glue. Ideal for countless applications in a variety of industries, the Dot Shot Pro replaces nearly all other adhesive tools and increases worker productivity.

Rugged, lightweight, and portable, the Dot Shot Pro was designed to be as simple and versatile as the Glue Dots® adhesive products it dispenses. "The Dot Shot Pro dramatically increases how fast Glue Dots can be applied," said John Downs, President, Glue Dots International. "It lets the user dispense the right amount of adhesive in a quick yet controlled way with no mess and no hassle."

The genius of the Dot Shot Pro's design is in its simplicity. The user simply loads a roll of Glue Dots and it is ready to go. Rolling the nose roller over nearly any surface, the user can apply a single dot or dozens of dots. No adhesive is wasted and the spent tape rewinds inside the dispenser.

With no sharp edges or cutters, the Dot Shot Pro is safer than a tape gun. Its ergonomic, triggerless design makes it safe for repetitive use, and it does not require electricity like a glue gun, so there are no cords or plugs to hold it back.

A wide variety of Glue Dots adhesive products can be used with the Dot Shot Pro, adding to its versatility. Users can select the right profile and strength for the job. This allows the Dot Shot Pro to be used in a variety of industries and applications, including packaging, printing, point-of-purchase, mailing, materials handling and even construction.

For more information about the Dot Shot Pro or to find your nearest distributor, call (888) 688-7131 or visit www.gluedots.com.

About Glue Dots International

Founded in 1999, Glue Dots International revolutionized the adhesives industry with pressure sensitive Glue Dots®. Located in New Berlin, Wis., the company holds several patents and continues to develop new, efficient adhesive products to help customers decrease costs and increase productivity.
